SOLICITING IN BARBER SHOPS.

It is a very common habit for barbers in most Barber Shops to solicit their clients for Shampoos, Singeing, Massage or Tonics. They are without doubt "necessities" in order to keep the face and scalp in good condition. But Potvin's Trade is composed of an intelligent body of clients who care not to be solicited. So are my instructions to my barbers not to solicit your customers for everything on the Calendar.

PROF. LEACOCK POPULAR AT WINDSOR HALL

Addressed Win-the-War Meeting Yesterday at Windsor.

VOTES FOR WOMEN.

"Too Bad that Women Do Not Vote" Sentiment Expressed by Prominent Professor.

The trend of modern politics was self-evident to all who attended the "Win-the-War" meeting held yesterday afternoon in the Windsor Hall. If women's interest in political matters is to be judged by the enthusiasm, the cheers and applause that greeted the various speakers, then it would appear that national questions in the future will be governed to no little extent by the opinion of female voters.

McGILL University had a direct interest in this meeting, for Prof. Leacock, in addition to many other prominent speakers, addressed the assembly, an assembly composed entirely of women anxious to have this worldwide struggle carried to a successful conclusion. Miss Hurlburt, too, an ardent worker in the movement to have all qualified women exercise their prerogative, was on the platform, although taking no active part in the discussion.

Prof. Leacock, with that characteristic style which can only be described by calling it "Prof. Leacock's," made a most brilliant and clever speech. Every word had behind it a powerful force which took the audience by storm. Applause followed applause, as sentence followed sentence, and the doctor succeeded in what appeared his intention—to instill some of his own ardor for the cause of Union Government into his most attentive listeners.

Without wasting any words on preliminaries, Prof. Leacock launched forth immediately into his subject. "Too bad that all women do not vote," were almost his first words, thereby winning the hearty approval of all the suffragettes present. The Quebec Liberal Government, the speaker thought, was to blame for the fact that only certain women were allowed to vote. The Conservative Government, on the other hand, had gone as far as its constitutional powers permitted in giving the vote to as many as it did.

Prof. Leacock made a most eloquent appeal for unity and harmony. He sincerely hoped that whatever results the election might bring, whatever party gained the ascendancy, we would nevertheless see the country united, in order that national interests might not be sacrificed by internal strife and conflict.

The speaker was extremely optimistic with regard to the final outcome of the present election. "We can," he said, referring to the Union Government, "afford to be calm, because we are going to win." "Let us leave it to the other side to use missiles," he exclaimed, with reference to the Berlin episode. "God forgive us that we ever called the place, Kitchener!" (Loud and prolonged applause.) He even took a cheery view of the Quebec situation. "True, we have large numbers against us, but we have the best and bravest on our side—even if the French," were his words, "all the Bulgarians, all the Turks, all the Germans are against Union Government." Cheers.

Taking up the question of conscription, the doctor thought it appalling that it should be necessary, but in his own words, it must be. There are two ways of sending men to the front, the voluntary system, and conscription. The former breaks up national organization, interferes with social development (by reason of taking men from positions essential to national advancement); the latter obtains the men from occupations not absolutely necessary to the country.

"Conscription or retire out of the war!" If we are in favor of retiring from the war, if we are willing to have Canada's noble efforts of the past sacrificed, then according to Prof. Leacock, we should vote for Laurier. But what we need now is a government of compulsion; a government that can command—that is what Union Government means. That same force and compulsion which is necessary to send men overseas, is also necessary at home. If we are going to have conscription of men, we must, as an essential accompaniment, have conscription of wealth. Those who stay at home should also serve, not, however, by "standing and waiting," but by giving up part of their wealth to the cause for which so many worthy men are laying down their lives.

Prof. Leacock closed his oratorical address amid loud and prolonged applause, referring to the necessity of keeping the home fires burning, in order that when our gallant

ARTS UNDERGRAD. COMPLETED PLANS

Smoker to be Held on Dec. 7th—General Invitation to Professors.

At a meeting of the Executive and Social Committee of the Arts Undergraduate Society, held yesterday afternoon, the final arrangements were completed for the coming Smoker, which is to take place in the Union on December 7th. The Glee Club has very kindly offered to supply a number of talented entertainers, and while no definite programme has been drawn up, a splendid entertainment is assured.

Dean Moyse, the Honorary President of the Society, and several prominent professors have signified their intention of being present. Captain Graham, lately returned from France, will be one of the chief speakers of the evening. He has seen a great deal of active service with the Canadian army, and his address is certain to be of exceptional interest. An invitation will also be extended to the Presidents of the various faculty undergraduate societies, and to Mr. Binnmore, President of the Glee Club. Arrangements have been made with an up-town caterer to supply refreshments during the evening, and nothing will be lacking in this respect. Plenty of "smokes" will also be supplied.

This smoker will be the first event of a social nature arranged for the special benefit of Arts students this season, and every member of the society should make a point of being on hand. First year students are especially urged to turn out, and meet their fellow students in the sophomore and senior years. No better opportunity could possibly be obtained for spending a pleasant and profitable evening.

At yesterday's meeting also, it was unanimously decided that a cordial invitation should be extended to every member of the faculty, professors, assistant professors, and lecturers, to be present at the coming smoker, and that this general invitation should be offered through the agency of the "Daily." Every member of the Arts professoriate is therefore invited to be present at the Union next Friday evening.

It was felt by all those present at yesterday's meeting that the presence of as many of the professors as possible would add materially to the success of the event.

THE DOZERS.

If any of our readers will take the trouble, the next time he is in the library, to look around at the men seated at his table, he will make a rather surprising discovery. He will find that nearly one-third are to all intents and purposes asleep. Supposing that there are half a dozen students near at hand, of these two will probably be making a more or less successful attempt at work, two more will be doing their best to disturb everyone with their conversation, and the remaining three will be seated with piles of books in front of them in a dozing state. We do not mean to say that the spectacle may be enjoyed every day of men actually asleep in the library, but we are convinced that a large proportion of those who go there leave it at the end of the day with very little work accomplished.

You may go up to one of these men afterwards and ask him how he has spent his day. "I was in the library the whole afternoon" will be the response, and, no doubt, the speaker believes that he has actually been working. As a matter of fact, he has yet to learn what mental labour is. The mere act of taking a book from the reference shelf and sitting down with it in front of one does not in any sense constitute one a worker. A student may sit for whole hours glancing vaguely at his book and occasionally taking a note, and yet may leave the library with his brain no whit fuller than it was when he entered it. He imagines at the end of the time he has allotted to his work that he has been studying; he has really been dozing.

There are men who doze in every walk of life, just as there are those who are wide awake all the time, but it is at the University that we see the dozer in his perfection. Around every college campus may be seen men who are never enthusiastic about anything, who are never well posted on the affairs going on around them, and who waste immense quantities of time without having anything to show for it all. To such men the most terrible thing in life is the approach of the examinations. Then, for a short time, they are compelled to abandon their sluggish ways and crowd into a few short days the work that should have been assimilated over a period of months. After the examinations are past the sudden flash of energy dies out, and the dozer returns to his broken rest.

Poor dozers! They have good hearts, perhaps, and their dozing is not harmful to their fellow students, but they will leave college without anything to build the foundations of their life on. The hours which should have been spent in character-building and in gathering knowledge (not only by means of books), have been spent in a pleasant sort of dream, which, however, must inevitably be broken into when they reach the rude outside world.

"MAKE HAY WHILE THE SUN SHINES."

The January examinations are coming! Five weeks from now they will be upon us. In the meantime, however, come the Christmas holidays, for only three more weeks must pass, and they will be here.

Now, what are we going to do with those three weeks until the holidays? Are we going to waste them, or shall we spend them in serious study? If we choose the latter course, we shall be able to enjoy ourselves during the vacation and need give no thought at all to examinations. Then we shall come back refreshed and ready to do our very best in all our work. It is only the unwise student who will be idle now, thinking that the holidays will afford him an excellent opportunity to make up for the time he has wasted. In this way he spends the time meant for rest and recreation in preparing for examinations, and gains nothing by it in the end. For when the examinations are over, he finds it difficult to take up his work again without some time for relaxation. Thus he loses ground in his studies, and his final results are not as good as they might have been had he worked at the proper time and rested at the proper time.

Let us therefore be wise, and work during the short time that remains to us, so that when the holidays come we may feel justified in spending them in the way in which they were intended to be spent, and not in studying for examinations.

PROFESSOR MUSSEY SPEAKS.

Professor Henry R. Mussey gave a most illuminating talk at the Institute of Arts and Sciences in the Horace Mann Auditorium on the subject of Business Competition and Cooperation in the Far East. He spoke particularly on the relation between China, Japan and the United States. The beginning of trade in the East, he said, was forced. The Orientals did not want us, but we pushed our way in and only so long as the western nations could make money in the East, were their relations perfectly happy with them.

The United States, according to Prof. Mussey, has two big problems to face, firstly the question of Eastern immigration to this country, which has reached only a temporary settlement, and secondly our business and governmental relation in the East. Regarding our Chinese trade, Prof. Mussey said that it was only in its infancy, but would increase in great proportions as soon as industry in China increases. It is therefore to our interest to stimulate manufacture in China.

Prof. Mussey laid particular stress (Continued on Page 4.)

QUIPS

UNCLE SAM — COLLAR BUTTONS.

Where do buttons go, that we lose every day? On fresh supplies we spend our dough, yet they, too, fade away. If each man loses two a week (one hundred odd a year), the aggregate would form a peak as high as Pike's, or near. We never find one on the street or in our humble hall, yet some weird fate those studs must meet, or they would crush us all. Ten million studs! Just stop and think of what the phrase can mean; in luxury 'twould keep a gink for all life, I ween. The million studs at ten cents per retail at—let me see—a million plunked enough to stir the heart of 'em John D. Yet all this kale, this luscious gold, is yearly lost from sight; if you and I could but make bold to catch those studs—good-night! We'd be the richest guys on earth, we'd roll in cash like mud; each year we'd have an income worth—gold diggin' there goes a stud!

CASUAL CLARENCE.

He answers any question you like to put.

TO-DAY'S PERPETRATION.

Quest: What is the difference between a detective and a fourth year Med. playing poker?

Ans: One dogs the heels and the other hogs the deals (if you let him).

ANSWERS TO CORRESPONDENTS.

Dear Iva,—I am thinking of starting a collection of flowers and plants. Knowing that you are interested in all such green stuff, I should like to know what you think would be a suitable beginning for my collection.

Thanking you in advance,
Yours in distress,
ALF. THAYER, '21.

Dear Alf.—In view of the present food situation, we would suggest your starting your flower collection with Five Roses.

Yours,
IVA PAYNE.

PUTTY-EYED PERCIVAL SAYS.

The saying that a man must work for his education at McGill apparently depends on the fact that he must first open the library door.

What we need now is cheap ice, we have so many cheap skates.

THE TRUTH AT LAST.

(Being a Tragedy.)
Scene: One of the busiest corners of the downtown district.

Time: 6:00 p.m. Just as the teeming crowds issue from the shops and factories and hasten homewards.

CHARACTERS.

Professor Dr. H.
Newspaper (standing at corner)
Crowds (hastening by)

As we stood, watching the multitude stream by, the din occasioned by the passage before us, of innumerable vehicles, in our ears, we saw him approaching. He strode leisurely along, seemingly pre-occupied with his own thoughts. Possibly he was meditating upon the wisdom and genius of the long departed Aristotle, more probably upon the evils and corruption of the modern state. At any rate the bland look upon his face betokened a total lack of interest in his surroundings. A newsboy suddenly ran against us in a frantic endeavour to make a sale. When we had sufficiently recovered our equilibrium to permit of another survey of the scene before us, we noted a very perceptible transformation in the countenance of the professor, who was now almost beside us. The former look of pre-occupation had suddenly given place to a flash of eager interest. A gleam of excitement shone in his eyes. With one huge stride he reached the side of the vendor of jambalaya wares. Once more the hoarse voice of the ragamuffin broke out, and we could scarcely suppress an involuntary start as we for the first time caught the refrain, "The Truth!"—The Truth! Grasping the astonished urchin by the arm with a vise-like grip, the professor almost shouted, in a voice hoarse with emotion, but with a vehemence and precision acquired by means of long

as I love the blushing flowers
That smile in summer light,
But, wow! by all the powers!
Those darn mosquitoes bite!

II.
I love the cows and chickens,
They give me such delight,
I wonder why the dickens
Those darn mosquitoes bite!

III.
The land before my gaze is
A truly lovely sight,
But tell me why the blazes
Those darn mosquitoes bite!

As we stood, watching the multitude stream by, the din occasioned by the passage before us, of innumerable vehicles, in our ears, we saw him approaching. He strode leisurely along, seemingly pre-occupied with his own thoughts. Possibly he was meditating upon the wisdom and genius of the long departed Aristotle, more probably upon the evils and corruption of the modern state. At any rate the bland look upon his face betokened a total lack of interest in his surroundings. A newsboy suddenly ran against us in a frantic endeavour to make a sale. When we had sufficiently recovered our equilibrium to permit of another survey of the scene before us, we noted a very perceptible transformation in the countenance of the professor, who was now almost beside us. The former look of pre-occupation had suddenly given place to a flash of eager interest. A gleam of excitement shone in his eyes. With one huge stride he reached the side of the vendor of jambalaya wares. Once more the hoarse voice of the ragamuffin broke out, and we could scarcely suppress an involuntary start as we for the first time caught the refrain, "The Truth!"—The Truth! Grasping the astonished urchin by the arm with a vise-like grip, the professor almost shouted, in a voice hoarse with emotion, but with a vehemence and precision acquired by means of long

as I love the blushing flowers
That smile in summer light,
But, wow! by all the powers!
Those darn mosquitoes bite!

II.
I love the cows and chickens,
They give me such delight,
I wonder why the dickens
Those darn mosquitoes bite!

III.
The land before my gaze is
A truly lovely sight,
But tell me why the blazes
Those darn mosquitoes bite!

McGILL MAN KILLED.

Lieut. Norman Gordon Campbell, Sci. '16, who was killed in action at Passchendaele, was a Science student at McGill, when he enlisted in the 2nd Battery, First Brigade, under Lieut.-Col. MacLaren, a few days after war was declared. He went to the front with his unit in February, 1915, and fought through the second battle of Ypres, Festubert, Givenchy and Poelcappelle, his good work during these engagements winning recognition, with the result that he received his commission in the field in May, 1915. He was the son of the late W. J. Campbell and Mrs. Campbell, of 510 Cooper street, Ottawa, and a brother of Mrs. Walter Kearns, of this city. His brother, Major Alex. Campbell, Sci. '97, of the Canadian Engineers, died at Quebec from an illness contracted at Valcartier, where he was undergoing training with the first contingent. A nursing sister, Lillian Campbell, is at present in the Northern Hospital at Leeds, England.

PROF. LEACOCK POPULAR AT WINDSOR HOTEL.

(Continued from Page 1.)
soldiers return, they may have a reception worthy of their unselfish endeavours.

Previous to Dr. Leacock's speech, addresses were given by the following gentlemen: Col. C. C. Ballantyne, E. Fabre Surveyor and Capt. J. Ross.

All referred to the exigency of continuing to send reinforcements to the front, if we desire to play the same part we have heretofore played in the war. Laurier, although receiving the praise that all admitted was his due reward, nevertheless came in for bitter attacks by his opponents, who were of the opinion that his referendum programme was dilatory and unsatisfactory.

A CORRECTION.

News has been received that Gunner A. H. MacKay, who was reported to have died while training, died of spinal meningitis in No. 10 Field Hospital, after three months' service at the front.

MR. BRITLING CLEAR SIGHTED.

Mr. Wells' book "Mr. Britling Sees it Through" has been translated into French. Unfortunately, the title appears on the French volume as "M. Britling Commence a Voir Clair," which, of course, is an unmerited aspersion on Mr. Britling's clear-sightedness. The mistake shows how difficult it is, sometimes, to give the exact meaning of a colloquialism in another language. That Mr. Britling was as wide-awake as most will be quite apparent to his French readers, in spite of the misleading title.

R. V. C. NOTES.

The French play, "La Farce de Maître Patelin," will be presented this afternoon, at 3:30, in the Common Room of the R. V. C. Admission is 25c., and the proceeds are to be in aid of the McGill Women's Union.

A very amusing representation is expected, and there will be the added attraction of musical selections between the acts by Miss Augusta Schmidt and Miss Thibaudau. It is hoped that there will be a large attendance.

INTER-YEAR BASKETBALL.

Seniors and Sophomores the Winners.

Yesterday afternoon at 5:10, one of the most thrilling events of the basketball year took place in the form of a double match between the Seniors and Juniors; and then between the Sophomores and Freshies. The former were the first to take the field in the following line-up:

Seniors.

Forwards: E. Hay, R. Goodwin. Centre: C. Hay. Wings: F. Green, E. Duval. Guards: L. Fowler, G. Gardner.

Juniors.

Baskets: R. Abbott, G. Craig. Centre: R. Salomon. Wings: B. Macdonald, D. Lewis. Guards: L. Cruikshank, R. Rogers.

During the first half the score mounted rapidly in favour of the Seniors, the Juniors showing more ability to foul than do anything else. The game had not been in progress long before an accident happened to one of the Seniors—a sprained ankle. This meant that a Junior was removed from the third year team, and the game continued with six players on each side instead of seven, as before. When the Sophomores and Freshies took the floor with the following line-up, the score for the first players was 20 to 6 in favour of the fourth year.

Sophomores.

Baskets: R. Contant, M. Goddard. Centre: G. Moody. Wings: C. Rorke, H. Davidson. Guards: Q. Savage, K. Milligan.

Freshies.

Baskets: J. Spier, K. Cameron. Wings: H. McIntosh, G. Louis. Centre: M. Fares.

Guards: H. Higginson, E. Cox. Curious as it may seem, history does tend to repeat itself, and nowhere could one find a better example of the truth of this saying the events of the second part of the basketball matches. The score rose rapidly point after point for the second year, until at second half time it stood at 19 to 8—but the analogy does not end here. A second accident took place which at first appeared to be of a more serious nature than the first, but the second year victim pluckily protested she was "all right" and went on to the finish.

Evidently the spirits of the third year were greatly revived by the oranges which they received at half time, because there was a most noticeable improvement in their playing, their score creeping up on that of the seniors until finally it was 24 to 17, still in the Seniors' favour, and just then the whistle blew—giving the game to the fourth year. During the last half between the Sophomores and the Freshies the latter managed to send their score soaring from 8 to 24, but the second year had in the meantime increased theirs to 29, so the results for the afternoon were that the Seniors and Sophomores were victorious.

TO AMERICA ON A PROPOSED ALLIANCE BETWEEN TWO GREAT NATIONS.

What is the voice I hear
On the winds of the western sea?
Sentinel, listen from out Cape Clear
And say what the voice may be.
'Tis a proud free people calling loud
To a people proud and free.

And it says to them: "Kinsmen, hail,
We've served have been too long,
Now let us have done with a worn-out tale—

The tale of ancient wrong—
And our friendship last long as our love doth last, and be stronger
than death is strong."

Answer them, sons of the self-same race.

And blood of the self-same clan;
Let us speak with each other face to face,

And answer as man to man,
And loyalty love and trust each other as none but free men can.

Now fling them out to the breeze,
Shamrock, Thistle and Rose,
And the Star-spangled Banner unfurl
With these—

A message to friends and foes
Wherever the sails of peace are seen and wherever the war wind blows—

A message to bond and thrall to wake,
For whenever we come, we twain,
The throne of the tyrant shall rock and quake,

And his menace be void and vain,
For you are the lords of a strong land and we are lords of the main.

Yes, this is the voice of the bluff March gale;

We've served have been too long,
Now let us have done with a worn-out tale—

The tale of an ancient wrong—
And our friendship shall last as love doth last and be stronger than death is strong."

SCIENCE MADE MERRY LAST NIGHT.

(Continued from Page 1.)
cake," even after they were so replete that they were in danger of suffering serious consequences.

After supper, Dr. F. D. Adams, Dean of the Faculty, was called on for a speech. He commenced by remarking that it was a terrible thing to establish the reputation of being a funny man, and to have to live up to this reputation in every speech. He also deplored the fact that "Doc" Ware was not present to employ one of his famous shuffles on those present. As it was, the first and second year men were at one end of the room, the third and fourth year men at the other end, and he in the middle.

Dean Adams referred to a recent conversation he had with Prof. Durley, who is now employed with the Imperial Munitions Board. Among other duties he has to consider inventions submitted to the Board. One suggestion for the destruction of submarines that was not accepted, was as follows. First, go to Newfoundland and get seals. These seals were to be tamed and specially trained. A dummy submarine would have to be built, and the seals taught to dive under this and butt it with their noses. They were to be attracted by fastening bundles of fish to the bottom of the submarine.

In actual fighting, a package of high explosive was to be attached to the neck of each seal. When it came near the enemy "sub," the seal was to dive and butt the bottom of it, thus setting off the explosive and destroying the submarine. It was not stated what happened to the seal, but it is thought that a new seal would have to be used each time.

Another incident that the Dean mentioned took place in the Harvard O. T. C. The students were advancing in semblance of an actual advance at the front. There was one line of students in front carrying red flags to represent the artillery barrage, followed by the attacking party.

The following conversation took place between the French instructor and an old-time American officer. "What are the men carrying the red flags?" "That's the barrage." "Why don't the attacking party fall on their faces in the pauses in the advances?" "Oh, they have bombs fastened in them in front, and if they fell—tout serait disparu."

In closing Dr. Adams expressed great appreciation for Capt. Simpson's work in the C.O.T.C. in addition to his college duties. He is much beloved by all the students. He has taken charge of the administration of the C.O.T.C. not only on parade, but also every day of the week off parade. Everyone feels extremely grateful to Capt. Simpson for the great interest and self-sacrifice he has shown towards the C.O.T.C.

After Dr. Adams' speech was concluded, J. A. Dorian favoured the meeting with several popular songs. In every case the gathering joined heartily in either the chorus or the whole song.

A. A. Scott then played several college songs, in which all joined. Finally, every one present stood while three verses of "Hail Alma Mater" were sung. After "God Save the King" and the McGill yell, the Smoker came to an end. Universal thanks are due to those in charge of the Smoker for the thorough preparation which went to make the affair a success, and also to the Union staff, whose efficient services were heartily appreciated by all.

FOUR STARS IN THE PATHÉ SERIAL.

Four popular screen favorites have been engaged by Pathé for the production of a new serial which will be released under the title "The Hidden Hand." They are Doris Kenyon, who will be starred in the production, and Arline Pretty, Sheldon Lewis, and Mahlon Hamilton, who will be featured. The picture is to be seen at the leading theatres at an early date.

This is the first serial in which Miss Kenyon has appeared, but she has made a big screen name for herself in the features in which she has been starred by a number of prominent companies. Miss Arline Pretty has one serial to her credit. She was the featured number of the cast in "The Secret Kingdom."

Sheldon Lewis is a veteran of the serial. This is the third of the chapter pictures in which he has appeared. As the Clutching Hand in "The Exploits of Elaine" he won great popularity among serial fans. His reputation was enhanced by his work as the Iron Claw in the Pathé serial of that name. Mr. Hamilton has been leading man for Olga Petrova. His latest picture is the Lasky production called "The Undying Flame."

The story of "The Hidden Hand" is the work of Arthur B. Reeve and Charles A. Logue. Mr. Reeve has a big following among magazine readers for his mystery and detective stories, while some of the best photodramas of the day have been conceived in the fertile brain of Mr. Logue. They are writing both the story and the scenarios for "The Hidden Hand," which is called by Pathé, "the four-star serial," an adventure story of love and mystery.

Elaborate studio accommodations in one of the most up-to-date studios of the East were engaged for the production.

Never before, it is stated, has such a prominent cast appeared in a serial production as that engaged in "The Hidden Hand."

PROFESSOR MUSSEY SPEAKS.

(Continued from Page 2.)
upon the economic condition in China as it affected the United States. He asserted that China had a crying need for capital, but that this need had been taken advantage of by western nations for gaining large concessions and granting huge loans. It was here, he said, that America could profitably play a part. Our policy in China has always been singularly fair,

CERCLE FRANÇAIS

MEETING GREAT SUCCESS

Mr. Surveyor, K.C., Read Series of War Poems, Which Were Greatly Appreciated.

The Cercle Français held their second meeting of the season last evening at the Edinburgh Cafe. By 6:30 quite a large number of the members had assembled and a little later sat down to supper. But the repast was not very far advanced, when the speaker of the evening arrived.

As he had but a short time at his disposal he was at once called on by the president to deliver his speech.

He was then introduced by Dr. Villard, the hon. president, with a few remarks.

Instead of delivering an address the speaker proposed to read some French poems, bearing on the present war. He first read several poems showing the French spirit and great confidence of the nation in Joffre. He then read several humorous pieces, which kept the whole club in a continual laughter.

The speaker's mode of expression was very realistic. It made you imagine as though you saw the actual scenes. When he sat down, long cheers of applause followed.

Dr. Villard then asked the speaker to relate a story.

This was about an old fashioned French farmer долing out his views on the war. Several of his sayings were very acute, such as, "We are fighting against the English," etc., not knowing very much about the war. He simply heard of the war, and drew his own conclusions.

The speaker then left, as also Dr. Villard, who had an important engagement.

The minutes of the last meeting were then read by O. Klineberg, the secretary, and adopted. The president, Mr. Rochedieu, then called for new business.

A proposition was then brought up, on the president's suggestion, that the Cercle should hold a theatre party at the Théâtre National Français, on Dec. 14, but this was not settled.

O. Klineberg then brought up a proposition that the Cercle have a French reading competition at the next regular meeting, at which prizes should be given for the best readers, and that Dr. Villard should be the judge. As the programme for the next meeting was practically mapped out already, this proposition was given a hoist till 1918.

so much so that the people had a very friendly feeling towards American capital.

Prof. Mussey said that we should consider whether we ought to enter into some kind of arrangement with other financial powers on terms favorable both to China and to the other nations. This is one of our most important questions. He was very insistent upon the fact that our success in China depended on economic and not political pressure.

DISTINGUISHED MCGILL GRADUATE AT ST. PAUL'S CHURCH.

The Rev. Jean Charlemagne Bracq, D.Litt., LL.D., Professor of Romance Languages at Vassar College, Poughkeepsie, N.Y., will address the congregation of St. Paul's Church, at the 11 o'clock service to-morrow morning on the subject: "Religious Forces in France." Dr. Bracq is a graduate of McGill, and studied also in Paris under Renan, Taine and a Sabatier. His first book—France under the Republic—a new edition of which appeared last year, has had an immense circulation in the United States, and has been widely read and carefully studied in schools and at conferences. His latest book is entitled "Provocation of France, or Fifty Years of German Aggression." Dr. Bracq is distinguished as a lecturer as well as an author, having given series of lectures at the Lowell Institute, Boston, the New Old South Church, and the leading Universities and Colleges.

NOTICE TO '18 MEN.
